

1. Introduction
2. Methodology
3. Results
4. Discussion
5. Conclusion

The following text is a detailed description of the methodology used in the study. It includes information about the study design, the participants, the data collection methods, and the statistical analysis. The methodology section is divided into several sub-sections, each describing a different aspect of the study. The first sub-section describes the study design, which was a randomized controlled trial. The second sub-section describes the participants, who were recruited from a local community. The third sub-section describes the data collection methods, which included interviews and questionnaires. The fourth sub-section describes the statistical analysis, which was performed using SPSS software.
